

Name: Sadiq Abdellal

Country: Palestine

Institution: IUG – Islamic University of Gaza

Role: Head of Mechanical and Industrial Engineering

E-mail: sabdelall@iugaza.edu.ps

He is Doctor of Engineering (Ph.D.) from Technische Universität Berlin, Germany. Dr. Abdellal has a wide experience in development programmer's evaluation and assessment, strategic planning, monitoring and evaluation methods using scientific methods and he well known of Palestinian higher education systems and communities. Dr. Abdellal is currently the coordinator for “Improving Governance Practices at Palestinian Higher Education Institutions/ UniGov” project granted by Erasmus+ and an educational expert for Enhancing the Employability of engineering students and alumni of IUG through better Linkages with the Private Sector project funded by International Labour Organization (ILO). Also, Dr. Abdellal is Consultant for ABET unit at the Islamic University of Gaza from 2015 until now. Dr. Abdellal coordinated a project titled: Middle Eastern Partnership in Sustainable Engineering (ME-ENG); The aims of that project are to strengthen the relevance of higher education and to contribute to lifelong learning (LLL) in the partner countries. Further he was a coordinator for a project titled: Modernizing Undergraduate Renewable Energy Education: EU Experience for Jordan (MUREE); the objective was to develop, integrate, accredit and evaluate a quality bachelor degree programme in Renewable Energy in Jordan with an appropriate laboratory component jointly taught by universities in Jordan, in accordance with the Bologna process. Dr. Abdellal has several publications related to this project that best illustrated his qualifications such as "The Role of Resource Efficiency in Engineering Education", "Shaping the Engineering Qualifications for Improving Living Standards and Resources Efficiency" and " A Dynamic Model for Matching Job Market Qualifications Demand and Educational Market Qualifications Supply".
